That's is something we are working on, but no, we don't have one right now.

Thank you, Maryam! This is helpful. Is there a single figure showing all sampling locations, or maybe one figure showing the 658 and another showing the 995? I see several figures in one of the reports, but they're of specific areas of the site.

Thanks,
Sara

Subject: Riv Ag Park Documents

Sara:

I have attached the EStor list of documents, with some specific documents highlighted. The April 2006 RI by Geomatrix has summarized much of the data that was collected at the site, and also has some reports as appendices. Check the RI ToC for specifics. I also have highlighted the CEQA documents. The Response Plan also has maps with all sampling locations on it; but I will warn you that tracking individual locations is tedious because of the huge number of samples collected at the site.

Let me know if you have any problems accessing the documents.
